

Annual Management Report of Fund Performance

December 31, 2007

Galileo Fund

Management Discussion of Fund Performance

INVESTMENT OBJECTIVE AND STRATEGIES

The Fund aims for high long-term total investment returns by investing in mostly common shares of North American companies. The Fund invests primarily in small and medium sized companies with strong growth potential. The portfolio manager uses a bottom-up, growth investment style for the equity portion of the portfolio. The Fund may invest in non-North American stocks, but they are not typically expected to exceed 30% of the net assets of the Fund.

As part of its strategy, the Fund may engage in short selling as a result of special relief it obtained from the Canadian securities regulators and engage in securities lending as permitted by securities regulators.

RISK

The Fund remained fully invested in 2007, with around 8% of the portfolio in cash and cash equivalents at the year of the year. 20% to 30% of the portfolio was invested outside of North America for most of the year. This foreign portion of the portfolio was heavily weighted towards the Asian exchanges and in particular securities that would be expected to benefit from the strong growth of the Chinese market.

Investors in the Fund should have a long-term investment horizon. As this Fund invests in smaller and medium sized companies, there are general risks such as stock market and smaller company risks, among other risks, which are associated with such investments.

The Fund did not participate in any short selling or securities lending during 2007.

RESULTS OF OPERATIONS

The Fund performed very strongly in 2007. The performance was 20.19% and 21.52% for the Class A and Class F units of the Fund respectively, outperforming the Fund's benchmark which is a blend of 50% the S&P/TSX Small Cap Index and 50% the S&P/TSX Mid Cap Index. The blended benchmark had a return of 3.34%. The S&P/TSX Mid Cap Index had a return of 5.78% and the S&P/TSX Small Cap Index had a return of 0.90% for the year.

The Fund held a number of Asian listed securities that posted very strong returns in the first 6 months of the year. These securities were listed on the Hong Kong, Australian and Singapore exchanges. The 2nd half of 2007 was a challenging environment to invest in small and mid cap securities with the global exchanges sending investors on a roller coaster ride.

The Fund began the year strongly overweighted in materials to capitalize on China's seemingly insatiable appetite for basic materials. Over the course of the year, the portfolio decreased this exposure and increased the weighting of the industrials.

RECENT DEVELOPMENTS

In May 2007, the Fund issued an Amended and Restated Simplified Prospectus. In it, the Fund's Investment Objectives were changed to highlight that this Fund would be moderate or greater risk and that it invests primarily in small and mid capitalization companies.

RELATED PARTY TRANSACTIONS

Galileo Funds Inc., the Fund's Manager and Trustee, is a wholly owned subsidiary of Galileo Global Equity Advisors Inc. (formerly Galileo Equity Management Inc.), which is the Fund's Portfolio Advisor. Galileo Funds Inc. receives management fees based on the average net assets of the Fund. The management fees are used to pay for sales and commissions, the investment management of the Fund and other general administration. For the period ended December 31, 2007, the total management fees charged by Galileo Funds Inc. to the Fund was \$62,521.

The Fund invests in units of the Galileo Money Market Fund. To avoid duplication of management fees, the Fund reverses the fee that is charged by the Galileo Money Market Fund.

FINANCIAL HIGHLIGHTS

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past 2 years. This information is derived from the Fund's audited annual financial statements.

Net Assets per Unit

Calculated in accordance with GAAP

	Class A	Class A		Class F	Class F

Net assets, end of period	\$ 12.86	\$ 10.92		\$ 13.70	\$ 11.57

(1) Net assets and distributions are based on actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.

(2) The Fund was launched in September 2000 with 1 class of units. It was sold via an offering memorandum and was therefore open only to accredited investors. In November 2006, the various provincial securities commissions approved the prospectus of the Fund. At this time, the original class of units became Class F and a 2nd class of units, Class A, was launched. As such, the beginning of the 2006 period for Class A is November 14th, 2006 and for Class F is January 1st, 2006.

(3) Distributions were reinvested in additional units of the Fund.

FINANCIAL HIGHLIGHTS (cont'd)

Ratios and Supplemental Data

Calculated based on Transactional NAV

	Class A	Class A		Class F	Class F
	2007	2006		2007	2006
Net asset value ⁽¹⁾	\$ 2,897,876	\$ 13		\$ 1,652,540	\$ 1,946,559

Trading expense ratio ⁽⁴⁾	3.75%	1.80%		3.75%	1.80%

- (1) This information is provided at December 31 of the period shown, as applicable.
- (2) Management expense ratio for each class of units is based on the total expenses of the Fund, incurred by or allocated to that class of units for the period shown, expressed as an annualized percentage of the daily average net asset value of that class during the period.
- (3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
- (4) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

MANAGEMENT FEES

The Fund pays an annual fee of 1.90% of the net asset value of Class A and 0.90% of the net asset value of Class F plus GST to the Fund Manager in consideration for the provision of management, distribution and Fund advisory services. This management fee is calculated as a percentage of the Fund's net asset value per class and is calculated and credited daily. The Fund is required to pay Goods and Services Tax (GST) on the management fee.

PAST PERFORMANCE

The performance information shown below assumes that all distributions made by the Fund in the period shown were reinvested in additional units of the Fund. The performance information does not take into account sales, redemptions, distributions or other optional charges that would have reduced returns or performance. It is important to note that the past performance of the Fund does not tell you how the Fund will perform in the future.

Year-by-year Returns

The following bar chart indicates the Fund's historical annual returns, which will vary from period to period. It shows the percentage change in value of an investment from the first day to the last day of each fiscal year, as applicable.

* Return is for a partial year starting November 14th, 2006 (the date the Fund first became eligible for purchase via simplified prospectus).

Annual Compound Returns

The following table shows the Fund's historical average annual compound returns compared with its benchmark, a blend of 50% the S&P/TSX Small Cap Index and 50% the S&P/TSX Mid Cap Index for the periods shown ended December 31, 2007. The inception of the Fund was November 14, 2006.
