

Semi-annual Management Report of Fund Performance

June 30, 2008

Galileo Global Active/Passive Fund

Management Discussion of Fund Performance

INVESTMENT OBJECTIVE AND STRATEGIES

The Fund invests using a combination of a passive investment strategy and an active investment strategy. The passive portion of the portfolio is invested in 50 largest exchange-listed U.S. stocks and the 50 largest developed-country American Depositary Receipts (ADRs) or global shares listed on major U.S. stock exchanges. These 100 stocks are all equally weighted. Shaunessy & Company Ltd. of Calgary, Alberta is the portfolio sub-advisor for this passive portion.

The remaining 40% of the portfolio is invested primarily in shares of companies around the world that are expected to profit from future economic growth. Galileo Global Equity Advisors Inc. is the portfolio advisor for this 40% of the Fund's portfolio. The allocation of this portion of the portfolio among sectors and countries is generally determined by where the portfolio manager finds the best investment opportunities.

As part of its strategy, the Fund may engage in short selling as a result of special relief it obtained from the Canadian securities regulators and engage in securities lending as permitted by securities regulators.

RISK

The Passive portfolio remains fully invested in the 100 largest capitalized US and International companies in the manner described above. The active portfolio continues to have a significant cash and cash equivalents position to protect the Fund against the wild swings in the global stock markets. These 100 large companies are all traded in US dollars and have been negatively impacted by the upsurge in the value of the Canadian dollar.

Investors in the Fund should have a long-term investment horizon.

The Fund did not participate in any short selling or securities lending during 2008.

RESULTS OF OPERATIONS

The Fund out-performed in the benchmark S&P Global 100 Index in Canadian Dollars during the first half of 2008. The Fund performance was (8.75)% and (8.28)% for the Class A and Class F units of the Fund respectively. The Fund's benchmark, had a return of negative (14.40)% for the same period.

The rise of the Canadian dollar had a strong negative impact on the performance of the Fund as it made the U.S. listed securities in the portfolio worth comparatively less.

RECENT DEVELOPMENTS

The Fund has been given exemptive relief from the regulators to invest in the BetaPro family of closed end funds.

- (1) This information is provided at June 30 or December 31 of the period shown, as applicable.
- (2) Management expense ratio for each class of units is based on the total expenses of the Fund, incurred by or allocated to that class of units for the period shown, expressed as an annualized percentage of the daily average net asset value of that class during the period.
- (3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
- (4) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

MANAGEMENT FEES

The Fund pays an annual fee of 1.95% of the net asset value of Class A and 0.95% of the net asset value of Class F plus GST to the Fund Manager in consideration for the provision of management, distribution and Fund advisory services. This management fee is calculated as a percentage of the Fund's net asset value per class and is calculated and credited daily. The Fund is required to pay Goods and Services Tax (GST) on the management fee.

PAST PERFORMANCE

The performance information shown below assumes that all distributions made by the Fund in the period shown were reinvested in additional units of the Fund. The performance information does not take into account sales, redemptions, distributions or other optional charges that would have reduced returns or performance. It is important to note that the past performance of the Fund does not tell you how the Fund will perform in the future.

Year-by-year Returns

The following bar chart indicates the Fund's historical annual returns, which will vary from period to period. It shows the percentage change in value of an investment from the first day to the last day of each fiscal period, as applicable.

* Return is for a partial year starting November 14th, 2006 (the date the Fund first became eligible for purchase via simplified prospectus).

Annual Compound Returns

The following table shows the Fund's historical average annual compound returns compared with its benchmark the S&P Global 100 Index in Canadian Dollars for the periods shown ended June 30, 2008. The inception of the Fund was November 14, 2006. The S&P Global 100 Index is an index of the 100 largest stocks by capitalization globally.

	1-year	Since Inception
Class A	-15.17%	-5.59%
Class F	-14.27%	-4.47%
S&P Global 100 Index in CAD	-17.99%	-9.44%
