Galileo Money Market Fund

Management Discussion of Fund Performance

INVESTMENT OBJECTIVE AND STRATEGIES

The Fund's objective is to provide maximum income while preserving capital and liquidity. It invests primarily in Canadian money market instruments such as Canadian treasury bills.

RISK

Units of the Fund were approved to be sold to retail investors by the securities commissions on November 14, 2006 via the filing of a simplified prospectus. At the time of the approval, the Fund held a cash portfolio. Between November 14th and December 31, 2006 the Fund became fully invested in short-term investments. While these securities represent a higher level of risk than the all cash portfolio, there is no difference in risk between this portfolio and what is described in the simplified prospectus.

RESULTS OF OPERATIONS

As the Fund became a reporting issuer on November 14th, 2006, only the performance for the period from November 14th to December 31st is disclosed in this report. The Fund had a return of 0.16% for the period November 14, 2006 to December 31, 2006.

The Fund became fully invested in short-term investments by December 31, 2006.
