

Semi-annual Management Report of Fund Performance

June 30, 2007

Galileo Small/Mid Cap Fund

Management Discussion of Fund Performance

INVESTMENT OBJECTIVE AND STRATEGIES

The Fund invests primarily in shares of smaller and medium North American companies that are expected to profit from future economic growth, and may also invest in income and royalty trusts.

The portfolio manager uses a bottom-up, growth investment style. It seeks to invest in companies at an early stage of their development and hold them until they achieve success through rising sales, earnings and cash flow.

As part of its strategy, the Fund may engage in short selling as a result of special relief it obtained from the Canadian securities regulators and engage in securities lending as permitted by securities regulators.

RISK

During the first six months of 2007, the Fund began investing in foreign equities. As at June 30th, foreign equities comprised 11.5% of the Fund's net assets. The largest component of the foreign equities are Hong Kong listed securities. The Hong Kong market has had strong performance in 2007 and the Fund benefited from this exposure.

The Fund decreased its exposure to Canadian equities from 80.51% to 72.80% and also decreased the weighting of cash and cash equivalents from 19.4% to 14.4%

Investors in the Fund should have a long-term investment horizon. As this Fund invests in smaller and medium sized companies, there are general risks such as stock market and smaller company risks, among other risks, which are associated with such investments.

The Fund did not perform any short selling or securities lending in the first six months of 2007.

RESULTS OF OPERATIONS

The performance for the period January 1, 2007 to June 30, 2007 for the Class A and Class F units of the Fund was 18.96% and 19.55% respectively. The Fund performance beat the Fund's benchmark, a blend of 50% the S&P/TSX Small Cap Index and 50% the S&P/TSX Mid Cap Index. The blended benchmark had a return of 10.73%. The S&P/TSX Mid Cap Index had a return of 11.92% and the S&P/TSX Mid Cap Index had a return of 9.54% for the first six months of the year.

Securities that performed particularly well, relative to the Index, in the last six months include NaiKun Wind Energy Group, Plutonic Power Corporation, Sino Forest Corporation, Allen-Vanguard and CAE Inc. Specific securities in the Fund that underperformed the Index in the last six months include, High Arctic Energy Trust, Falcon oil & Gas, Amerigo Resources and Bear Ridge Resources.

Notable additions to the Fund were NaiKun Wind Energy Group, Idaho General Mines Inc. and Agrium Inc. Companies removed from the Fund include Hudbay Minerals, WestJet Airlines Ltd and Shoppers Drug Mart.

RECENT DEVELOPMENTS

On November 14th, 2006, the 13 provincial and territorial securities commissions of Canada gave final receipt of the Prospectus for the Galileo Funds. Prior to this, Galileo Small Mid/Cap Fund was only open to accredited investors.

The name of the Portfolio Manager of the Fund changed from Galileo Equity Management Inc. to Galileo Funds Inc.

- (1) Net Asset Value and distributions are based on actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period. The above calculations include combined actual and average data; therefore, the table will not total accordingly.
- (2) The Fund was launched in September 2000 with 1 class of units. It was sold via an offering memorandum and was therefore open only to accredited investors. In November 2006, the various provincial securities commissions approved the prospectus of the Fund. At this time, the original class of units became Class F and a 2nd class of units, Class A, was launched. As such, the beginning of year for Class A is November 14th, 2006 and for class F is January 1st, 2006.
- (3) Distributions were reinvested in additional units of the Fund.

Trading expense ratio ⁽⁴⁾	0.58%	0.63%

- (1) This information is provided at June 30 or December 31 of the period shown, as applicable.
- (2) Management expense ratio for each class of units is based on the total expenses of the Fund, incurred by or allocated to that class of units for the period shown, expressed as an annualized percentage of daily average net assets of that class during the period.
- (3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
- (4) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.

MANAGEMENT FEES

The Fund pays an annual fee of 1.95% of the net asset value of Class A and 0.95% of the net asset value of Class F plus GST to the Fund Manager in consideration for the provision of management, distribution and Fund advisory services. This management fee is calculated as a percentage of the Fund's net assets per class and is calculated and credited daily. The Fund is required to pay Goods and Services Tax (GST) on the management fee.

PAST PERFORMANCE

The performance information shown below assumes that all distributions made by the Fund in the period shown were reinvested in additional units of the Fund. The performance information does not take into account sales, redemptions, distributions or other optional charges that would have reduced returns or performance. It is important to note that the past performance of the Fund does not tell you how the Fund will perform in the future.

Year-by-year Returns

The following bar chart indicates the Fund's historical annual returns, which will vary from period to period. It shows the percentage change in value of an investment from the first day to the last day of each fiscal year, as applicable.

* Return is for a partial year starting November 14th, 2006 (the date the Fund first became eligible for purchase by retail clients).

Annual Compound Returns

The following table shows the Fund's historical average annual compound returns compared with its benchmark, a blend of 50% the S&P/TSX Small Cap Index and 50% the S&P/TSX Mid Cap Index for the periods shown ended June 30, 2007. The inception of the Fund was November 14, 2006.
