

Annual Management Report of Fund Performance

December 31, 2009

Galileo Small/Mid Cap Fund

Management Discussion of Fund Performance

INVESTMENT OBJECTIVE AND STRATEGIES

The Fund invests primarily in shares of smaller and medium Canadian, Australian, and Hong Kong companies that are expected to profit from future economic growth, and may also invest in income and royalty trusts.

The portfolio manager uses a bottom-up, growth investment style. It seeks to invest in companies at an early stage of their development and hold them until they achieve success through rising sales, earnings and cash flow.

As part of its strategy, the Fund may engage in short selling as a result of special relief it obtained from the Canadian securities regulators and engage in securities lending as permitted by securities regulators.

RISK

The Fund decreased its position in its cash & cash equivalents during the period to 1% as signs of economic recovery prompted opportunities to pick up bargains in the market place both domestically and abroad. Accordingly, the portfolio holds an increased position in Hong Kong (22%). The fund increased its holdings in the domestic commodities sectors of Energy and Materials.

Investors in the Fund should have a long-term investment horizon. As this Fund invests in smaller and medium sized companies, there are general risks such as stock market and smaller company risks, among other risks, which are associated with such investments.

The Fund did not participate in any short selling or securities lending during 2009.

RESULTS OF OPERATIONS

The net assets of the Fund increased by 45% from the prior year after taking into account the assets transferred in due to the merger (see "Recent Developments" section). The majority of the increase was due to a significant appreciation of the underlying securities of the portfolio during the latter part of the year. Interest income declined from 2008 as a result of interest rate cuts by the Bank of Canada to historic low levels along with the decreased position in cash in the portfolio.

The Fund underperformed its benchmark by approximately 14% during 2009. The Class A and Class F units of the Fund had performance of 41% and 42% respectively for 2009. The benchmark is a blend of 50% the S&P/TSX Small Cap Index and 50% the S&P/TSX Mid Cap Index. The blended benchmark had a return of 55%. The S&P/TSX Mid Cap Index had a return of 48% and the S&P/TSX Small Cap Index had a return of 62% for the period.

The Fund underperformed relative to the Index as a result of holding a large cash position during the first several months of the year as the stock market was showing signs of an economic recovery. Through the second half of the year, relative performance improved as the cash was deployed. Opportunities in Hong Kong as well as in the domestic Energy and Materials sectors allowed the Fund to take advantage of a strengthening global economy.

RECENT DEVELOPMENTS

On May 31, 2009 the Galileo Canadian Active/Passive Fund, Galileo Global Active/Passive Fund, Galileo Fund, and Galileo Absolute Return Fund (“Terminating Funds”) merged into the Galileo Small/Mid Cap Fund (“Continuing Fund”). The merger was approved through a unitholder meeting and was carried out on a taxable basis under the Income Tax Act (Canada). The Continuing Fund assumed all the liabilities applicable of the Terminating Funds in return for the issuance by the Continuing Fund of units equal in value to the net assets acquired from the Terminating Funds. As a result the unitholders of each Terminating Fund became unitholders of the Continuing Fund.

On July 30, 2009, Northland Bancorp Inc. acquired a controlling interest in Galileo Global Equity Advisors Inc., the parent corporation of Galileo Funds Inc. and the Portfolio Advisor of the Fund.

RELATED PARTY TRANSACTIONS

Galileo Funds Inc., the Fund’s Manager and Trustee, is a wholly owned subsidiary of Galileo Global Equity Advisors Inc., which is the Fund’s Portfolio Advisor. Galileo Funds Inc. receives management fees based on the average net asset value of the Fund. The management fees are used to pay for sales and commissions, the investment management of the Fund and other general administration. For the period ended December 31, 2009, the total management fees charged by Galileo Funds Inc. to the Fund was \$90,890 (2008 - \$59,011).

The Manager is also the Trustee of the Fund and is responsible for certain aspects of the day-to-day administration. The Fund reimbursed the Manager for certain operating costs incurred in administering the Fund of approximately \$137,010. The Manager absorbed approximately \$80,056 (2008 - \$39,999) of total expenses. Such absorptions may be terminated at any time without notice.

- (1) Net assets and distributions are based on actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.
- (2) The Fund was launched in September 2000 with 1 class of units. It was sold via an offering memorandum and was therefore open only to accredited investors. In November 2006, the various provincial securities commissions approved the prospectus of the Fund. At this time, the original class of units became Class F and a 2nd class of units, Class A, was launched. As such, the beginning of the 2006 period for Class A is November 14th, 2006 and for Class F is January 1st, 2006.
- (3) Distributions were paid in cash or reinvested in additional units of the Fund.
- (4) This information is derived from the Fund's audited annual financial statements. The net assets per unit presented in the financial statements differs from the net asset value calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.

- (1) This information is provided at December 31 of the period shown, as applicable.
- (2) Management expense ratio for each class of units is based on the total expenses of the Fund, incurred by or allocated to that class of units for the period shown, expressed as an annualized percentage of the daily average net asset value of that class during the period.
- (3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
- (4) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

MANAGEMENT FEES

The Fund pays an annual fee of 1.95% of the net asset value of Class A and 0.95% of the net asset value of Class F plus GST to the Fund Manager in consideration for the provision of management, distribution and Fund advisory services. This management fee is calculated as a percentage of the Fund's net asset value per class and is calculated and credited daily. The Fund is required to pay Goods and Services Tax (GST) on the management fee.

Of the management fees paid by the Fund to the Manager for the Class A units, approximately 47% was used to pay for sales and trailer commissions and 53% was for portfolio management services. Of the management fees paid by the Fund to the Manager for the Class F units, approximately 0% was used to pay for sales and trailer commissions and 100% was for portfolio management services.

PAST PERFORMANCE

The performance information shown below assumes that all distributions made by the Fund in the period shown were reinvested in additional units of the Fund. The performance information does not take into account sales, redemptions, distributions or other optional charges that would have reduced returns or performance. It is important to note that the past performance of the Fund does not tell you how the Fund will perform in the future.

Year-by-year Returns

The following bar chart indicates the Fund's historical annual returns, which will vary from period to period. It shows the percentage change in value of an investment from the first day to the last day of each fiscal period, as applicable.

* Return is for a partial year starting November 14th, 2006 (the date the Fund first became eligible for purchase via simplified prospectus).
